ACKNOWLEDGEMENTS

The work summarized in this report is the product of the collaborative efforts of many researchers associated with the North Carolina Coastal Geology Cooperative, a multi-year research program led by East Carolina University, the United States Geological Survey, and the North Carolina Geological Survey, with contributions from scientists at the University of Delaware, the University of Pennsylvania, and the Virginia Institute of Marine Sciences. We would additionally like to acknowledge the assistance of Jim Watson, John Woods, Ron Crowson, and numerous graduate students. This work was funded in part by the USGS Cooperative Agreement award 02ERAG0044, and a UNC General Administration Research Competitiveness award. Other support came from the U.S. National Park Service, the U.S. Fish and Wildlife Service, Environmental Defense, NC Division of Coastal Management, and the NC Division of State Parks and Recreation. Sources of aerial photographs include: USACE-FRF, Duck, NC; USACE-Wilmington; CHNS, Manteo; NC State Database; NC DOT; U.S. Geological Survey.
